

Dr Adam Dennett FRGS
Centre for Advanced Spatial Analysis
University College London
Gower Street
London
WC1E 6BT
7th October 2016

Dear Sir/Madam,

I am very happy to write a letter of recommendation in support of Nathan Suberi's application for this position. Nathan has recently completed our MSc degree in Smart Cities and Urban Analytics for which I am the Course Director and I can say with confidence that Nathan is one of the very best students to have taken this programme over the years we have run it.

Nathan is boundlessly enthusiastic about everything he focuses his attention on and this enthusiasm is backed up by a strong intellect and prodigious application. This means that he has achieved very highly in his degree and has managed to set himself apart from many of his peers. Nathan has also demonstrated a creativity in his approach that has been very impressive. His dissertation thesis looked into solving the problem of food aid distribution within London through building a spatial decision support system. For this Nathan developed his own computer software which would allow organisations who ran food banks to test different deprivation scenarios along with alternative distributions of banks to assess the effectiveness of their networks. This was a highly original piece of work which demonstrated not only strong technical abilities, but also a depth of theoretical understanding which underpinned the whole piece.

As well as strong academic abilities, Nathan is also a very friendly and approachable person who would be an asset to any organisation and I am more than happy to write this recommendation in support of his application.

Yours faithfully,

Dr Adam Dennett
